What determines your participation in an activity?

Participation in every activity we did allowed us to LEARN, and that was the main importance of this course. Although I taught a WI course before and was given an idea of what my class should be like, this time I was guided in how to approach every aspect of the class.

I am goal-oriented, so if I decide to participate, I will participate. However, it is much easier for me to participate if a clear syllabus, with an outline of deadlines, is provided.

Describe some features/activities that were not beneficial to you?

Everything was beneficial because we learned from it in class, but I wish we could have had more face-to-face meetings, to do a quick review, even if it's a half hour, of the next module.
1/1/2018 10:51 AM

I do not any concern about.
12/22/2017 11:30 AM

Perhaps I am a bit of a dinosaur, but the blackboard site did not feel needed. The materials could have perhaps been delivered via email without having to remember to login and check bb as well?
